

TCC Africa Welcomes AMBAND as Technological Development Partner

Nairobi, Kenya — Training Centre in Communication (TCC Africa) is delighted to announce its partnership with AMBAND, an innovative and dynamic information technology company that prides itself by offering bespoke IT related solutions. This milestone collaboration will strengthen TCC Africa's technological infrastructure, supporting key projects such as research management systems and Persistent Identification (PID) systems, among others.

As TCC Africa's Technological Development Partner, AMBAND will play a key role in advancing TCC's mission to enhance the capacity of African researchers and institutions through technology-driven solutions.

TCC Africa is the [first African-based training institution](#) focused on improving researchers' capacity in scholarly and science communication. Established in 2006, TCC Africa has empowered thousands of researchers and institutions across the continent by providing training, resources, and support to advance their visibility and impact in global research and education. AMBAND's expertise will support the development of robust platforms and the integration of innovative technology tools into TCC Africa's operations and service delivery. This ensures seamless, efficient, and impactful solutions that advance the fulfillment of its programs.

AMBAND Limited was incorporated in the year 2008 to provide quality Information Communication and Technology products and services in the region. It is an indigenous owned IT company, with its offices in Nairobi, Kenya. Over the years Amband has become a global ICT consulting company with clients from every part of the world. Amband has been able to secure business from Governments, corporate bodies and

Non-governmental organizations who value quality ICT service delivery and fast response to their needs.

This collaboration positions TCC Africa to deliver cutting-edge, technology-enabled solutions that strengthen connections within the African research community and amplify its impact in the digital era.
